## Formolene ${ }^{\circledR}$ LB1820E2

## Linear Low Density Polyethylene (LLDPE) Resin for Film Extrusion Applications

Formolene ${ }^{\circledR}$ LB1820E2 is a general purpose butene based LLDPE film grade made using gas phase technology. The resin exhibits excellent toughness and puncture resistance.

Formolene ${ }^{\circledR}$ LB1820E2 meets all requirements of the U.S. Food and Drug Administration as specified in 21 CFR 177.1520, covering safe use of polyolefin articles intended for direct food contact.

## Suggested Applications:

Food Packaging
Industrial Liners
Trash Can Liners

Additives:
Antiblock - 5000 ppm
Slip - 1500 ppm
Processing Aid - No

[^0]:    Note: Film properties are based on slot-cast film extruded at $520^{\circ} \mathrm{F}\left(270^{\circ} \mathrm{C}\right)$ at $1.0 \mathrm{mil}(25 \mu \mathrm{~m})$ thickness. Actual film properties may vary depending on operating conditions and additive packages. Film properties are not intended to be used as specifications.
    Base density is estimated using the assumption that every 1000 ppm of antiblock in the finished product raises the density of the polymer by 0.0006 $\mathrm{g} / \mathrm{cm}^{3}$. Base density is the estimated density of the polymer if it did not contain any antiblock.
